REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art is not seen to teach or fairly suggest methods of treating hosts with HBV having a mutation at the 552 codon from methionine to valine (M552V mutation) in the DNA polymerase region using the L-2'-deoxy-cytosine or thymine nucleosides. The art teaches that mutations caused by lamivudine (L528M or M552I or double mutation at L528M and M552V) confers a broad cross-resistance to L-nucleosides (see Delaney et al., cited on PTO-892 herein), however, this instant application shows that L-dC and L-dT are highly active against the single M552V mutation (see tables 24a and 24b on page 181), which is seen to be unexpected in light of the art teaching the resistance of L-dC and L-dT in M552I mutants and M552V + L528M double mutants.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
